

## Module 26: Cloud Computing Lab

As a continuation of course modules 24 and 25, this hands-on workshop allows attendees to apply the Cloud Computing concepts, techniques, patterns and technologies previously covered in order to complete a set of exercises.

Both individual and group exercises are provided, requiring participants to solve a number of inter-related problems, with the ultimate goal of establishing service-oriented cloud computing architectures based on Software as a Service (SaaS), Platform as a Service (PaaS) and Infrastructure as a Service (IaaS) delivery models.

The instructor works closely with participants to ensure that all exercises are carried out completely and accurately. Attendees can voluntarily have any exercises reviewed and graded as part of the class completion.

This course corresponds to Exam S90.26, which is required for the following certification: Certified Cloud Computing Specialist
