

## SOA Security Specialist Certification Self-Study Kit Bundle

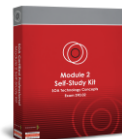

A Certified SOA Security Specialist has comprehensive knowledge of common threats and vulnerabilities associated with service-oriented solutions and modern service technologies and has demonstrated proficiency in establishing security extensions for contemporary service-oriented architectures through the mastery of security patterns, practices, and industry technologies. This certification bundle provides you with the self-study materials you need to prepare for the exams required to complete the SOA Security Certification. The bundle includes the following self-study kits:

**Module 1 Self-Study Kit: Fundamental SOA & Service-Oriented Computing (Exam S90.01)**

An overview of key concepts, terminology, technologies, benefits, and impacts of SOA, service-oriented computing and service-orientation.

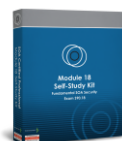

**Module 2 Self-Study Kit: SOA Technology Concepts (Exam S90.02)**

A study of the primary technologies used to build service-oriented solutions, with an emphasis on XML and modern Web-based services technologies.

**Module 3 Self-Study Kit: SOA Design & Architecture (Exam S90.03)**

An exploration of the service-oriented architectural model and the service-orientation design paradigm, including in-depth coverage of service compositions and runtime service roles.

**Module 18 Self-Study Kit: Fundamental SOA Security (Exam S90.18)**

Essential techniques, patterns, and industry technologies that pertain to establishing security controls and security architectures for service-oriented solutions

**Module 19 Self-Study Kit: Advanced SOA Security (Exam S90.19)**

Technical and complex topics pertaining to security for contemporary service-oriented solutions, infrastructure, middleware, and cloud-based service technology.

**Module 20 Self-Study Kit: SOA Security Lab (Exam S90.20)**

A hands-on lab during which participants apply security patterns, practices, and technologies to counter threats and solve a set of complex security problems.

For more information, visit [www.soaschool.com](http://www.soaschool.com) and [www.soacp.com](http://www.soacp.com).

This certification bundle price is based on a 20% discount applied to all self-study kits. To purchase a certification bundle you are not required to purchase all of the self-study kits in the bundle at the same time. You can purchase self-study kits one at a time and you will receive the last self-study kit at no charge (except for shipping). Please note that the bundle does not include the required text books listed below: SOA Principles of Service Design, SOA Design Patterns, Service-Oriented Architecture: Concepts, Technology, and Design, Web Service Contract Design & Versioning for SOA. These text books can be purchased separately or together with individual self-study kits or with the bundle when placing an order.

For ordering information, visit [www.soaselfstudy.com](http://www.soaselfstudy.com).
